

(C) High-coverage context

Q: why did the lady in green cover her mouth and bend down in the middle | Gold: A. laughing

MLP+NMS

Pred D (wrong) IoP 0.58

A larger fixed evidence budget can rescue cases where compact evidence overlaps the event but lacks enough context for the answer.

Oracle top-2

Pred D (wrong) IoP 1.00

A larger fixed evidence budget can rescue cases where compact evidence overlaps the event but lacks enough context for the answer.

Fixed 3+3

Pred A (correct) IoP 1.00

A larger fixed evidence budget can rescue cases where compact evidence overlaps the event but lacks enough context for the answer.

(D) Compact oracle support

Q: how does the baby react after the man in green shows his phone | Gold: A. lean forward to look

MLP+NMS

Pred A (correct) IoP 0.00

The answer can be correct even when selected evidence is ungrounded, while oracle evidence shows compact support was available.

Oracle top-2

Pred A (correct) IoP 1.00

The answer can be correct even when selected evidence is ungrounded, while oracle evidence shows compact support was available.

Fixed 3+3

Pred A (correct) IoP 1.00

The answer can be correct even when selected evidence is ungrounded, while oracle evidence shows compact support was available.

(E) Oracle recovers support

Q: why did the girl clap in the middle | Gold: B. follow the card

MLP+NMS

Pred D (wrong) IoP 0.00

Oracle evidence recovers the annotated support and answer when the learned selector routes to the wrong moment.

Oracle top-2

Pred B (correct) IoP 1.00

Oracle evidence recovers the annotated support and answer when the learned selector routes to the wrong moment.

Fixed 3+3

Pred B (correct) IoP 1.00

Oracle evidence recovers the annotated support and answer when the learned selector routes to the wrong moment.

(F) Grounded learned success

Q: how did the man move the sides of the cube quickly | Gold: C. twist it

MLP+NMS

Pred C (correct) IoP 1.00

The learned selector can find compact grounded evidence that is sufficient for Qwen to answer correctly.

Oracle top-2

Pred C (correct) IoP 1.00

The learned selector can find compact grounded evidence that is sufficient for Qwen to answer correctly.

Fixed 3+3

Pred C (correct) IoP 1.00

The learned selector can find compact grounded evidence that is sufficient for Qwen to answer correctly.

(G) Grounded answer error

Q: how does the lady react when the dog fetches the twig | Gold: C. watches dog run away

MLP+NMS

Pred D (wrong) IoP 1.00

High temporal overlap is necessary but not sufficient; the answerer can still misinterpret grounded evidence.

Oracle top-2

Pred C (correct) IoP 1.00

High temporal overlap is necessary but not sufficient; the answerer can still misinterpret grounded evidence.

Fixed 3+3

Pred C (correct) IoP 1.00

High temporal overlap is necessary but not sufficient; the answerer can still misinterpret grounded evidence.
